Kashaf Gulzar

Computer Science Student

Highly motivated and dedicated computer science student currently pursuing studies. Proficient in programming languages and databases such as C++, SQL Server, HTML, and CSS, with a strong foundation. Seeking opportunities to apply theoretical knowledge, contribute to real-world projects, and further enhance technical skills in a dynamic software development environment.

Experience

Volunteer In Service

06/02/2024 - 27/02/2024

- Conducted training sessions for students on various safety measures topics.
- Developed engaging and informative lesson plans tailored to different age groups, ensuring the accessible material and easy to understand.
- Utilized interactive methods such as role-playing, games, and multimedia presentations to enhance students engagement and retention of safety practices.

Computer Science Intern

7/2023 - 9/2023

Pakistan Bureau of Statistics

- Developed various web applications using HTML, CSS, and ASP.NET MVC.
- Worked on database design and maintenance to support web applications.

Executive Member

03/2023 - Present

JSPark Society, (CUST)

- Actively participate in meetings and contribute to decision-making processes.
- Collaborate with other executive members to plan and organize events, workshops, and initiatives.
- Assist in the management of society activities, including coordinating logistics, promoting events, and ensuring smooth execution.

Project

SciGen

- Designed and developed the SciGen application, focusing on its features, requirements, and database design.
- Created an ER diagram and designed the database tables on SQL Server to store and manage the generated scientific papers.
- Documented the application's features, design, and implementation details for future reference.
